Dr. Scott, welcome to New Mexico Albuquerque The University of New Mexico and especially to the The STUDENT AFFAIRS family!

Greetings Student Affairs team and friends!

After an exciting first day that mostly revolved around setting up computers and new employee paperwork, I am happy to share that I have been participating this week in New Student Orientation.

Knowing how critical these programs are to our incoming students, I am thankful to be receiving the same information and culture building they are.

While my schedule is already busy, I’m also enjoying exploring our beautiful campus and finding the many special places it contains. This week is making me excited to experience a thriving and vibrant campus community this fall.

How about you?

-Dr. Scott

Please welcome the newest member of our WRC family, Roxanna “Rox” Curiel. They are our new Student Success Specialist. They will be supervising all of the WRC’s student lead programs, supporting students with specific needs navigate and succeed within higher education. Rox studied Holistic Health and Healing Arts, Cranial Sacral Therapy, Medical Massage, and completed the 200-hour Yoga Teacher Training here at UNM. They are also a holistic bodyworker, reproductive justice organizer, and full-spectrum doula! They bring an amazing energy to the WRC, and we are so lucky to have them as part of our team!

We are excited to welcome Dr. Eric Scott as our new Vice President for Student Affairs! We’ve shared his professional qualifications and strengths, but we had other burning curiosities. We put together a “VP fun 5” list of other things we wanted to know.

Over the next 5 CONNECT editions you’ll find out Dr. Scott’s favorite place in the world, what he wanted to be when he grew up, if he has any hidden talents, what skills he thinks we all should have, and the one thing he wants to do this year that he’s never done before.

VP fun 5

Where is your favorite place in the entire world and why?

I have to say southeast Alaska. Not only is it one of the most stunning physical landscapes in the world, but the people, plants, animals, and culture there have shaped me in immeasurable ways.”
